LEAN INSTITUTE SLOVAKIA

LEI SK brings the first official

LEAN MANAGER ROUNDTABLE

an inspirational meeting of lean practitioners of top management,
this time uniquely in cooperation with the LEAN ENTERPRISE INSTITUTE HUNGARY

ROUNDTABLE DESCRIPTION:

The Lean Manager Roundtable provides the possibility of professional discussion for 15 – 20 lean managers of SVK and HU companies. The topics of the roundtable are flexible, based on “most discussed issues” at the scene.

- The activity always takes place on the grounds of the host company.
- It also features gemba tour and the demonstration of real case studies of successful implementation of the selected tool or method.
- Connection of formal site of activity with the creation of professional friendships in an informal atmosphere.
- The activity is managed by a specialist from practise to achieve maximum added value for the participants.
- The second part of the activity is aimed at common generating of proposals for the immediate implementation of the acquired knowledge - in the sense “**How do you achieve the level of implementation of the tool in your company and in your conditions?**”

ROUNDTABLE TOPIC:

Standardization of work as a way of increasing productivity by using the Training Within Industry method (3J)

Host Company / Coloplast Hungary

Yokoten – based on the Lean Lexicon published by Lean Enterprise Institute, it is a Japanese term for deploying concepts, ideas, or policies horizontally across the company.

This could also be done across organizations and our next Lean Manager Roundtable – which at this time will be held at Coloplast Hungary – provides a good opportunity for practicing this.

Our goal will be to learn about TWI and understand our host related experiences. We will also reflect on the things we have seen and share our own experiences, questions, concerns regarding the topic.

ROUNDTABLE AGENDA:

Day 1 Start: 6:30 pm

Common opening / Short introduction of the participants / Informal networking, dinner and discussions

Day 2 Start: 9 am to 5 pm

Start of a visit to the host company / Welcome by GM of host company / Gemba walk – general / Feedback to the host on the things seen on the gemba / Introduction to TWI, case study presentations / Gemba walk to review TWI case studies / Reflection of the gemba walk / Feedback to the host on the things seen on the gemba by groups / Final discussion, lessons learned / Closing

WHO SHOULD ATTEND?

Representatives of the top management of the production and non-production companies that have a direct impact on the continuous improvement strategies in their company. Number of participants is limited. LEI SK members have the right of priority attendance.

HOST COMPANY:

Coloplast

Coloplast is a Danish medical equipment/device manufacturer. It operates in the following business segments: Ostomy Care, Continence Care, Urology Care and Wound and Skin Care. The company was founded in 1957 and currently employs around 10 000 staff members all over the world with approx. 500 million dollars of profit. Thanks to its progressive growth and innovative approach, the company appeared on the FORBES Top Multinational Performers List.

Manufacturing site in Hungary is the largest production capacity of Coloplast with a significant position on the market. We have a unique occasion to visit its production in Tatabánya and get inspired by their successful implementation of standardized work with interesting benefits.
